

Workers' Compensation Management

According to the National Academy of Social Insurance, an estimated \$49.4 billion was paid out under workers' compensation in 2001.

Program Includes:

- Video or DVD
- Administrative Materials
- Software Templates

Video Length: 13 minutes

PROGRAM OVERVIEW:

Employee injuries can be extremely costly to your company, especially if you don't have a system in place designed to handle your workers' compensation claims and bring your injured workers back to work as soon as possible. This program outlines the components of an effective workers' compensation management program and will provide you with step-by-step instructions for establishing and managing your own program.

YOUR EMPLOYEES WILL LEARN:

- The Components of a Successful Workers' Compensation Management Program
- How to Establish a Workers' Compensation Management Team
- Correct Workers' Compensation Management Procedures
- How to Set up Transitional Work
- How to Train Managers and Supervisors
- Tips for Maintaining the Workers' Compensation Management Program

PROGRAM CONTENTS:

- Explanation of the State Requirements
- Step-by-step Instructions for How to Develop Your Workers' Compensation Program
