GHS Reminder

June 2016 is the deadline for suppliers to provide users with new Safety Data Sheets (SDS) for each of their products.

This will help increase the quality and consistency of information that is provided for workers, employers and chemical users. This will also enhance appropriate handling and use of chemicals.

For more information, visit OSHA.gov or give our office a call at 801.746.SAFE (7233). Please feel free to email me with any questions you may have at spistoia@utahsafety-council.org.

Motor Vehicle Safety in the 1960s

In the 1960s, many advancements were made towards vehicle and driver safety. The National Safety Council introduced the first Defensive Driving courses, seat belt installations became mandatory, and the U.S. Department of Transportation was founded.

Along with these improvements, the National Traffic and Motor Vehicle Safety Act of 1966 was put in place to help reduce not only crashes, but the number of deaths and injuries that resulted from traffic crashes. This Act provided a coordinated national safety program and helped establish new safety standards in vehicles. In the years following, vehicles were built with improved safety features, highways were made safer, and the enforcement of new traffic laws helped to change driver and passenger behaviors.

Today, the Utah Safety Council offers a variety of Defensive Driving courses to help meet your safety needs on the road. See our website for a full list of classes.

About Our Staff

Brandee Sommer began working at the Utah Safety Council in 2002. She has held several positions and is currently our Vice President of Operations. Brandee is a strong leader and a great example to our staff.

When not at work, Brandee enjoys spending time with her family, especially her nieces and nephew, and is expecting a new addition to her family soon.

Brandee is committed to seeing the Utah Safety Council continue to grow with new opportunities. Please reach out to her with questions at bsommer@utahsafetycouncil.org.

Emergency Medical Services in the 1960s

The development of the Emergency Medical Services (EMS) System began during the 1960s. Until that point, the local undertaker transported victims of emergencies in a hearse, receiving only a ride without any medical treatment. Eventually, the "Ambulance Attendant" was replaced by an Emergency Medical Technician (EMT).

As a relatively new profession, EMS has seen a tremendous change in the past 50 years. Advancements made in medicine have improved the quality of care to the critically ill or injured patients in a pre-hospital setting.

National EMS Week is celebrated May 15-21, where communities come together to honor the dedication of those who provide the day-to-day lifesaving services of medicine's "front line." This month we would like to honor two of our EMT instructors.

Golden Barrett has served as a professional firefighter and EMT for over 17 years. He is currently the Training Specialist for Hill Air Force Base Fire Department. With 12 years of instructing emergency care courses, Golden has been teaching for the Utah Safety Council for over five years.

Brandon Woods started teaching for the Utah Safety Council one year ago. He has served as a professional firefighter and EMT for over 18 years. He is currently with the Ogden Fire Department, and has been teaching emergency care courses for 12 years.

We are proud to have knowledgeable EMS professionals as instructors for the Utah Safety Council. Thank you for all you do in the communities you serve and for us at the Utah Safety Council.

Take Safety Home New FREE Booklets Now Available

Take Safety Home

Learn how to protect your family from the top five leading causes of unintentional home injuries.

The Utah Safety Council is encouraging everybody to Take Safety Home!

This free booklet was created to highlight the top five leading causes of unintentional home injury deaths: poisoning, falls, choking, drowning, and burns.

Order the newly updated Take Safety Home booklets online or contact Brittany Pitcher at 801.746.SAFE (7233) or email bpitcher@utahsafetycouncil.org.

ONLINE DEFENSIVE DRIVING

Before your drivers take to the roads, protect them and your company with our Defensive Driving Course (DDC) Online.

For more information, or to purchase user IDs, contact Jennifer Williams, Traffic Safety Program Manager at 801.746.SAFE (7233) or email jwilliams@utahsafetycouncil.org.

Fire Extinguishers: From the Middle Ages to Today

Although fire extinguishers appear to be a modern invention, they have been helping people fight fires since the Middle Ages. From squirting pumps used in the 1666 Great London Fire all the way to our modern-day red cylinders, the fire extinguisher has gone through many changes in design.

By the 1960s, fire extinguishers had developed into small, dry chemical units made for use at home. Further advancements were made with the invention of the chemical Super-K in the early 1960s. A few years later, the US Navy came out with Purple K, which is now considered the second most effective dry chemical for fighting flammable liquid fires.

To learn how to operate a fire extinguisher and gain hands-on experience with our live fire simulator, attend our Fire Extinguisher course on:

May 27th | 8:00 a.m. – 10:00 a.m.

Or contact Nicala Wood, our Occupational Safety Program Manager, to schedule an onsite training today!

Safety Certificate Courses

- Safety Inspections: May 3
- Job Safety Analysis: July 11

- OSHA 10-Hour Outreach Course for the Construction Industry: May 9-10
- Machine Guarding: May 12
- Fire Protection: June 1

- Workplace Violence Planning & Management: May 2
- First Aid, CPR and AED for Business: May 18, June 8
- Fire Extinguisher Training: May 27

Helping You Implement Safety in Your Facility

By individually matching our safety consultants to each organization, our consulting program allows us to help companies implement safety as never done before.
