Celebrating 80 Years of Safety

Safety Notes

October 2016

Volume 22

MEMBERSHIP MINUTE

by Sadee Pistoia
Membership Manager

Our Women in Safety meeting on September 28th was a great success. As the Membership Manager at the Utah Safety Council, I want to truly thank everyone who took time out of their schedule to come and listen to Deborah Hersman speak.

It is really inspiring to see how much dedication you all have to safety. As we continue to make a difference in safety, let's continue to celebrate our successes.

A special thank you to Tesoro, who has become an official sponsor of our Women in Safety group.

I look forward to seeing you all at the next meeting on November 9th. Watch for more details to come. If you have any questions, please feel free to contact me at 801.746.SAFE (7233) or spistoia@utahsafetycouncil.org.

New Member Focus Section

A spotlight is defined as “to give special attention to (something)”. We are excited to add a new section starting with this month’s Safety Notes to shine the spotlight on our members.

The success of the Utah Safety Council is the foundation that our members provide to our organization. We develop classes to meet your changing needs, we provide member benefits to add value to your association with us, and we appreciate our association with each of you.

Each month, we will be highlighting a member company or individual that views safety as we do and who utilizes the products and resources of the Utah Safety Council. We value your membership and your friendship and look forward to the upcoming issues of Safety Notes.

Member Spotlight: KapStone

KapStone Paper and Packaging Corporation was formed in April 2005 by industry veterans to establish operating businesses in the paper, packaging, forest products and related industries. Headquartered in Northbrook, Illinois, KapStone is a leading North American producer of unbleached Kraft paper and corrugated packaging products. KapStone’s paper mills produce a wide spectrum of kraft and recycled products ranging from containerboard, including liner and medium, to kraft papers, saturating kraft and folding carton board.

KapStone has been a member of the Utah Safety Council since 1998. Thank you for your support!

Have you considered becoming a First Aid, CPR/AED Instructor?

While many organizations offer occupational safety training, sometimes First Aid, CPR/AED training is overlooked. However, there are many benefits to having your own in-house instructor.

Tailored to Your Industry

First aid programs allow your company to customize training to your workplace, current risk management strategy, and industry in which you operate.

Cost Effective

Training can be costly! Rather than sending each employee to an outside organization for first aid training, many companies will designate one or two employees to attend a First Aid Instructor Course. This way, those employees who complete instructor training will be able to certify their own employees. If you consider the financial effects of workplace injuries, providing training for everyone will reduce incidents and have a positive financial impact in the long run.

Practical Benefits

First aid training gives your employees the knowledge and confidence to effectively manage an emergency without fear or confusion. Your employees become more aware of their safety surroundings, which will help bring down the number of incidents.

If you're considering introducing First Aid, CPR/AED Instructor training to your workplace, please contact Cassie Henson, Emergency Care Program Manager at 801.746.SAFE (7233) or email chenson@utahsafetycouncil.org.

Drive Safely Work Week is October 3-7

**DROWSY,
DISTRACTED, OR
FOCUSED...**

YOUR DECISIONS DRIVE YOUR SAFETY.

For free resources, visit UTAHSAFETYCOUNCIL.ORG

**National Fire Prevention Week
October 9-15**

Did you know... most residential fires occur during winter months? Winter will be here before we know it, so now is the time to prepare!

For a fire safety checklist and more prevention tips, visit UTAHSAFETYCOUNCIL.ORG or contact Rachel Hiatt at rhiatt@utahsafetycouncil.org

Workplace Violence Planning & Management

In 2013, the Bureau of Labor Statistics reported 23,000 significant injuries due to assault at work. Workplace Violence is a growing concern today among employers and employees. Shootings and homicides tend to get the most media attention, however, the most common forms of workplace violence come as intimidation, threats, and struggles for control.

Workplace violence isn't always about work either. It can come from people who don't have any affiliation with employees, such as a former partner or spouse.

Regardless of what type of workplace violence occurs, it should not be tolerated. Here are some suggestions that can help keep your work environment safe:

- Secure your business so that outsiders can't have easy access
- Alert supervisors about any concerns regarding security and investigate all violence incidents and threats
- Provide safety education training about how to recognize dangerous behavior and what to do if you experience workplace violence.

Learn how to better protect your employees and workplace by attending our next Workplace Violence Planning & Management course on October 19th. **This is a FREE course for Sustaining and Contributing Members.** Register online at UTAHSAFETYCOUNCIL.ORG.

Feeling stiff at work?
