# Utah Safety Council 2014 Annual Report

[UTAHSAFETYCOUNCIL.ORG](http://UTAHSAFETYCOUNCIL.ORG)

LOCAL CHAPTER

I want to thank our members, customers, and our staff for supporting the Utah Safety Council and making us the leader in providing safety training for the State of Utah.

As we look back on 2014, there are many highlights that are a result of our focus on our customers and broadening our presence in the community.

With the support of our Board of Directors, we added a full time Membership Manager to support our current membership, enhance benefits, and look for opportunities to provide our safety resources to more companies.

Our traffic safety programs were recognized by the National Safety Council and we experienced an increase in the number of online completions as the online class is now accepted by the Utah Driver License Division for point reduction. The Alive at 25 program experienced growth as it is the best driver education for young drivers. The addition of a new staff member to coordinate the registration process has had a positive impact on our program and allowed our staff to focus more time on their individual programs.

Our emergency care programs are an essential part of every company's plan to keep their employees safe. Throughout the year, we trained new first aid instructors, provided first aid classes in our training center and on-site for our members, and we continue to focus on the importance of having an AED in the workplace.

In 2014, our occupational safety training programs saw the largest growth. Our safety training program with the refineries and our MSHA training for mining continue to fill classrooms each month. In a partnership with Hexcel Corporation, we have developed an employee training program for their 850 employees that will start in early 2015. We recognized more than 20 individuals as they received their Advanced Safety Certificate during the calendar year. As we look to 2015, we are excited to be announce eight new safety training programs that will continue to help us see strong growth moving forward.

Our home and community program provides us with the opportunity to have more of a presence in the community. We participated in more company employee fairs, and community events during 2014 than any other time in our history. In addition to company events, we partnered with the Salt Lake Bee's for a Utah Safety Council night at the ballpark to promote our services and recognize our members.

In May, the Board of Directors approved the budget to develop a new website and update of our brand. We will be excited to unveil both in 2015.

It has been an exciting year and we are looking forward more opportunities to grow as an organization and as a staff.

Thank you again for all your support.

Rod Hamson  
President

| 2014 Fiscal Year Financial Statement ..... | 35 |

For over 75 years, the Utah Safety Council has devoted its efforts to making Utah a safer place to live and work. The Utah Safety Council was founded in 1936 and established as the Utah Traffic Safety Council in 1939. In 1945, the scope of the Council's programming extended to non-traffic areas. From 1951 to 2001, the Utah Safety Council also functioned as a division of the Utah Department of Public Safety. In 1956 the Utah Safety Council became a local chapter of the National Safety Council.

Throughout its history, the Utah Safety Council has continued to expand its programs and services to provide the latest safety and health resources to business, industry and the community at large. The Utah Safety Council's success and longevity can be attributed to creating a culture of relationship building focused on customer service. The Utah Safety Council has directed its efforts to continued improvement in programs and services.

The scope of the Utah Safety Council's programs and services are divided into five pillars, they are Membership Services, Occupational Safety, Traffic Safety, Emergency Care Safety, and Home & Community Safety.

## **Our Mission**

The mission of the Utah Safety Council is to save lives by promoting safety and health through education, services, and products.

## **Our Vision**

To be recognized as the foremost authority and point of reference for safety and health resources and education in the communities that we serve.

## **Our Values**

To provide our services with integrity, quality and in a timely manner to all of our customers.

The Utah Safety Council Board of Directors is comprised of 18 members consisting of both business and civic leaders. All board members give of their time and talents in a volunteer capacity. The board is a continuous directing body. The Board of Directors governs and directs the council, it establishes policy and strategic direction and it is the sole trustee of the organization. The board is a corporate body and acts only on the basis of group discussion and decision.

**BRYAN PETT – CHAIRMAN OF THE BOARD**

General Manager, Concentrator, Rio Tinto Kennecott Utah Copper

## Utah Safety Council Website

The Utah Safety Council's website provides the latest tools and information to its members, customers and the community. The website is continually updated to provide the most current safety training, resources and information. The number of visitors to the Utah Safety Council's website continues to increase. During 2014, the site averaged over 7,300 visitors per month.

### Our Website Visitors

- 72% of our website traffic is from Utah
- Our average visitor spends 3.26 minutes on our site  
(The national average is only 1 minute)

### Members Only Website

The Members Only section of our website averages over 1,300 hits per month. This section of our website is loaded with information our members have asked for such as:

- Background on standards
- Sample policies and checklists
- Articles and fact sheets for your newsletter or safety meeting
- Responses to frequently asked questions
- The latest safety and health news, and more

**60%**  
of the visitors to  
our website were  
new in 2014.

**We are excited to announce that coming in the Summer of 2015 the Utah Safety Council will be launching a new and improved website.**

Utah Safety Council membership enables companies to build a world-class safety environment while saving time and money. Members understand that while it is increasingly difficult to conduct business in this economic climate, attention to workplace safety can boost their bottom line, improve efficiency, increase employee morale and decrease costly insurance premiums.

The Utah Safety Council's ability to offer the numerous safety services it provides is due to the generous support from many safety conscious companies throughout the Intermountain area. Utah Safety Council members consist of 844 businesses and organizations throughout Utah and the Intermountain West. During 2014, there were 36 Sustaining Members, 67 Contributing Members, 4 Extended Members and 737 General Members.

We had the opportunity to hold four member events in 2014. We held two here in our Salt Lake City office. We had 30 attendees in April and 60 attendees in August. We were very excited that we were able to head south for the other two. We were in Cedar City with 10 attendees and St. George with Attendees as well. We are looking forward to not only holding our Member Appreciation events her in Salt Lake City but also moving our events outside of the Salt Lake area to reach more of our members.

## Safety Media Library

The Utah Safety Council's *Safety Media Library* is one of the largest, most comprehensive safety libraries with over 900 up-to-date titles. Titles contained in the library cover a broad spectrum of subjects including traffic safety, home safety, occupational safety and various other general safety topics. A complete listing of the presentation titles, production dates and length of programs can be found online at [UTAHSAFETEYCOUNCIL.ORG](http://UTAHSAFETEYCOUNCIL.ORG). Member feedback is taken into consideration when purchasing new materials for the library.

The Utah Labor Commission's Workplace Safety Grant Program provided \$0,000 during 2014 to help the Utah Safety Council provide the latest and most helpful training media presentations. Grant money was used to purchase 15 new personations for the Safety Media Library. The rest of this grant money was used to purchase the new Streaming Safety Videos service in December. During 2014 our safety DVDs were loaned out over 3,200 times and viewed by more than 40,000 people.

### Streaming Safety Videos **Coming in 2015**

We are excited to announce that the Utah Safety Council will be offering Streaming Safety Videos for our Members. We have partnered with the *Training Network* to provide this service to our members.

This new benefit includes:

- Over 450 titles to choose from with new videos added monthly
- Unlimited viewings
- Most safety videos come with an online quiz to add to your safety meetings
- There is also a leader's guide that you can download to help facilitate safety meetings.

## 31<sup>st</sup> Annual Utah Conference on Safety and Industrial Hygiene Conference

The Utah Safety Council proudly supports the Annual Utah Conference on Safety and Industrial Hygiene. The objective of the conference is to provide a forum for the exchange of information and ideas related to environmental health and safety issues that affect the workplace, general environment and community. General and concurrent safety and industrial hygiene sessions focus on current safety, industrial hygiene and environmental issues as well as technical updates and information on more effective interaction in the workplace. One-day of selected short courses precedes the two-day general and concurrent session conference and the expo provides an opportunity for companies to show new products and ideas. This conference was held on October 15-17, 2014. Over 300 people attended this conference.

# Journey to Safety Excellence

Each year we honor companies and individuals who have achieved success in Safety. For 2014, we chose the theme of "Journey to Safety Excellence". For many of us, going on a journey can be an exciting adventure. It can open our eyes to new experiences and new places and create lasting memories that become part of our lives forever. The "Journey to Safety Excellence" starts with each of us, and we recognized individuals and companies who are making this journey.

The meeting was held on Friday, September 5, 2014 at the Sheraton Salt Lake City Hotel, Deborah Hersman, the new President of the National Safety Council was our Keynote speaker. We also welcomed Wesley Ruff, sportscaster for ABC Channel 4 News as our emcee for the awards luncheon.

Each year, the Utah Safety Council offers approximately 150 courses covering various topics in occupational safety.

These include Occupational Safety and Health Administration (OSHA) Compliance Courses for General Industry and Construction, Mine Safety and Health Administration (MSHA) New Miner and Refresher Training, and Contractor Safety Orientation (UITC) courses. Occupational courses range from half-day presentations to programs that are four days in duration. We also offer courses online that are designed for all levels of safety expertise.

Subjects include generic preparatory courses such as Principles of Occupational Safety and Health, Fundamentals of Industrial Hygiene, Lift Truck Instructor Certification, as well as courses that focus on specific subject areas such as Machine Safeguarding.

## On-Site Training

On-site training is convenient, flexible and effective! Our certified trainers can:

- Deliver any of our occupational safety training courses wherever and whenever you choose.
- Customize the content and learning activities to include your organization's policies, procedures and forms.

During 2014 the Utah Safety Council held 115 on-site courses throughout Utah.

**440**  
people attended  
our professional  
development courses  
during 2014.

## Contractor Safety Orientation (UITC)

The Contractor Safety Orientation course is designed for contractors or contract employees who perform work on refinery properties. This one-day program is administered by the Utah Safety Council for the association of local petrochemical companies (Utah Industrial Training Cooperative). Topics include: general industrial safety, hearing conservation, elevated work, electrical safety, hand safety and the worker's role in safety. **Over 2,600 people received this certification during 2014.**

## Mine Safety & Health Training (MSHA)

The Utah Safety Council has a MSHA approved training program. During 2014, courses were held twice a month to help certify and re-certify those working in a surface metal/non-metal mining location, as well as underground locations. Training includes new/inexperienced miner training and annual training for experienced miners. **Over 2,100 people received their MSHA certification from the Utah Safety Council during 2014.**

**We are excited to announce that starting in 2015 we will begin offering Mine Safety & Health Training courses in Southern Utah.**

## Advanced Safety Certificate

The Utah Safety Council offers the National Safety Council's *Advanced Safety Certificate* (ASC) program. This certificate program is designed to maximize effectiveness for safety leaders and help establish best safety practices for an organization. Students are taught techniques to address administrative, technical and cultural elements that affect safety within their organizations. Upon fulfilling the requirements of the program, students have the ability to assess the safety needs in their workplace and implement effective solutions to eliminate unsafe conditions and reduce the frequency of unsafe acts. Twenty-three people earned their *Advanced Safety Certificate* in 2014.

## Certificate in OSHA Compliance

The Utah Safety Council also offers the National Safety Council's *Certificate in OSHA Compliance* courses. These courses give students the ability to read and interpret OSHA standards in order to comply, avoid fines, and make their workplaces safer for all. Participants choose the compliance issues that are most important to their organization and receive in-depth reviews of the relevant standards through these courses. Twenty-four people earned their *Certificate in OSHA Compliance* in 2014.

## Office Safety Certificate **Coming in 2015**

Over 72,000 people are injured annually in an office setting. To help address these hazards the Utah Safety Council has developed the new *Office Safety Certificate*. This will be earned by taking the Office Safety Course, the Office Ergonomics Course, the Fire Extinguisher Training Course, and the First Aid, CPR and AED for Business Course within a two-year period.

## Scholarship Program

During 2014, the Utah Labor Commission awarded a \$30,000 grant to the Utah Safety Council that provided scholarships to selected training offerings. Scholarships consist of partial tuition subsidies for Utah businesses. A total of 109 scholarships were awarded to 66 companies. Since the inception of the program, over 2,300 scholarships have been awarded.

## Consulting Services

The Utah Safety Council matches our safety professionals to your organization's needs. Their expertise will help you answer questions and address critical workplace safety needs. Consulting services include, but are not limited to:

- Walk-through evaluations
- Customized training programs
- Safety program revisions/audits
- Policy development assistance
- Develop Written Safety Program
- Ergonomic Assessments
- Accident Investigations

## Defensive Driving Training Awards

The Utah Safety Council received several awards from the National Safety Council at the 2014 Congress and Expo in San Diego for its Defensive Driving programs. The Utah Safety Council is one of 21 chapters with the National Safety Council.

The Best Performance award is presented to Chapters that lead the field in training safer motorists on the highways in their area. The Utah Safety Council received:

- Best Performance – DDC Online – Public
- Best Performance – DDC Online – Fleet

The Trend Setter award is presented to Chapters that consistently strive to achieve a high status of performance. The Utah Safety Council received:

- Trend Setter – Defensive Driving Instructor Development Courses

The Honorable Mention is presented to Chapters that work to reach as many drivers as possible. The Utah Safety Council received:

- Honorable Mention – DDC 4 - Fleet
- Honorable Mention – DDC Alive at 25

*Pictured to the right is, Rod Hamson, President of the Utah Safety Council; Deborah Hersman, President of the National Safety Council; Jennifer Williams, Traffic Safety Program Manager; Sadee Pistoia, Membership Manager; Brandee Sommer, Vice President of Operations; Jeffrey J. Woodbury, Chairman of the National Safety Council Board.*

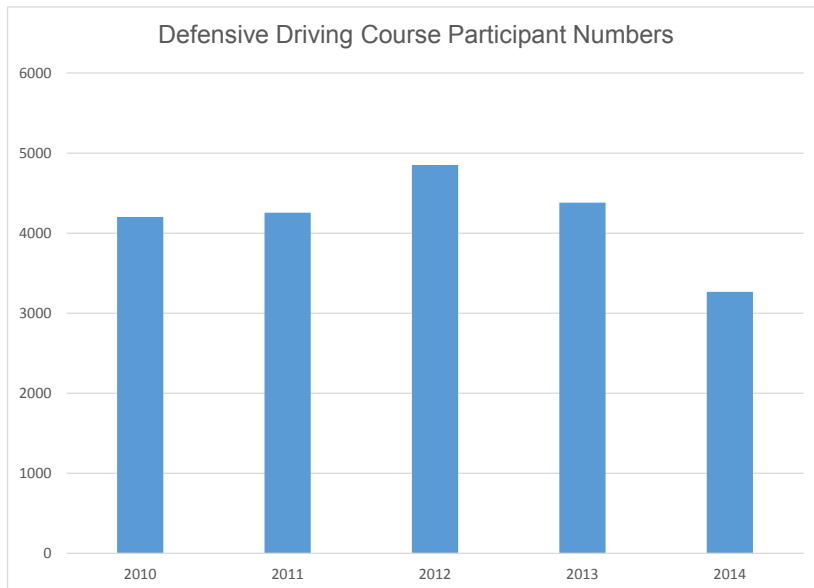

## Defensive Driving Course

The Utah Safety Council conducts Defensive Driving Courses in 11 locations throughout Utah.

This four-hour course covers an array of topics from hazardous road conditions to safe following distances. Upon completion of the course, attendees are eligible to receive a 50 point reduction from their Utah driving record. Students who are 55 years of age or older, may receive discounts on their automobile insurance premiums.

Many employers have also taken advantage of the Defensive Driving Course by either arranging an on-site course, or by training their own instructor to offer the course to their employees. During 2014, 15 on-site courses were held which trained 353 participants.

Instructor Development Courses are taught twice each year for those interested in becoming certified to teach the Defensive Driving Course. Seventeen individuals completed the Instructor Development Course with the Utah Safety Council during 2014.

Over  
**3,200**  
individuals  
completed the  
Defensive Driving  
public courses in  
2014.

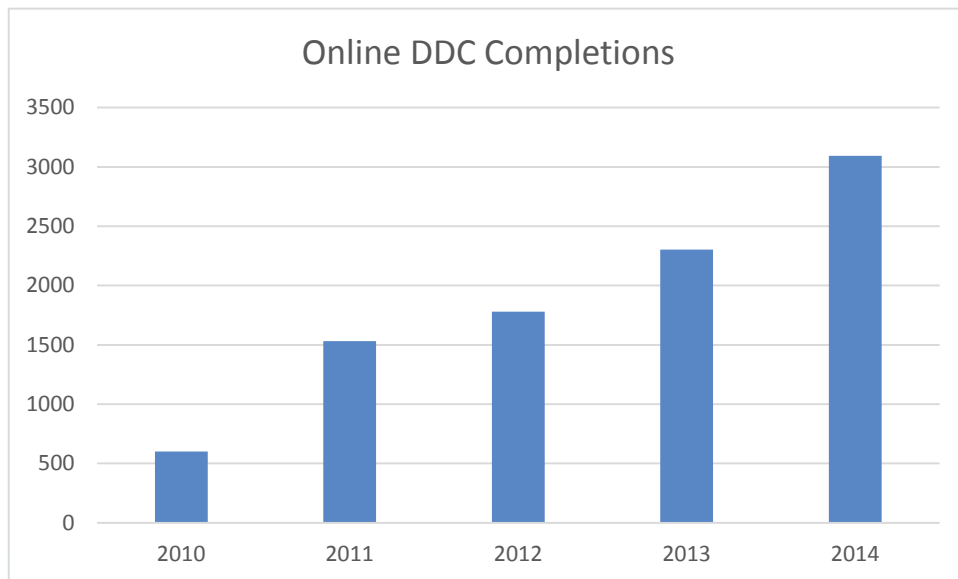

## Online Defensive Driving Course

The Utah Safety Council offers the National Safety Council's Online Defensive Driving Course (DDC). This course is a self-paced driver improvement program. In approximately four-hours, DDC Online offers practical strategies to reduce collision-related injuries, fatalities and costs.

This course is utilized by many Utah companies to train their employees. Individuals are also referred to take the course by courts and the Utah Driver License Division. The course is available in English and Spanish. Starting in April of 2014 this course now qualifies for a 50-point reduction on a Utah Driver LicenSe record.

During 2014, over 3,000 individuals completed the online course. Approximately 64 courts utilize the Utah Safety Council's Online Defensive Driving Course. This program has seen continual growth over the last five years. We are looking forward to further expansion throughout the state in the coming years.

## Alive<sup>®</sup> at 25

Alive at 25 is a young driver intervention program developed by the National Safety Council for drivers between 15 and 24 years of age. It is a four-hour program that focuses on the decision making processes and behaviors that young drivers and passengers display in a motor vehicle. All courses are taught by law enforcement officers and are currently offered in various high schools and courts throughout Utah. The Alive at 25 course also qualifies for a 50 point reduction on a Utah Driver License.

Approximately 1,500 students completed the Alive at 25 course in 2014. Nine schools support the Alive at 25 program by regularly holding courses at their location. In addition, several courts refer young traffic offenders to the Alive at 25 course. Since Alive at 25 was implemented in Utah in October 2007, over 9,800 students have taken this course.

Over  
9,800  
students have  
taken the  
Alive at 25  
course.

## Network of Employers for Traffic Safety (NETS)

The Utah Network of Employers for Traffic Safety (NETS) is administered by the Utah Safety Council. The goal of the program is to help Utah businesses reduce the costs associated with motor vehicle crashes through implementation of effective on-the-job traffic safety programs.

Supported by over 1,000 local employers, the Utah Network of Employers for Traffic Safety is continually striving to reduce the number of traffic crashes involving Utah workers and their families by helping employers design and implement traffic safety programs.

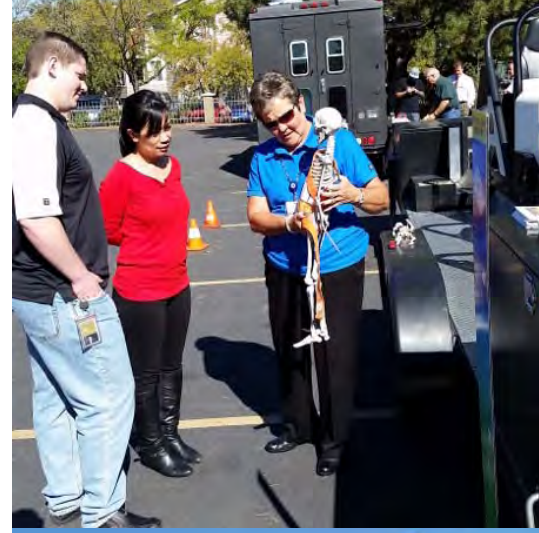

### Drive Safely Work Week

Drive Safely Work Week (DSWW) was observed during the week of October 6-10, 2014. This observance was promoted through the Utah NETS webpage, Utah NETS newsletter and in emails sent out to participants.

On Monday, October 6<sup>th</sup> a kickoff event was held for Utah NETS participants. Each participant received the Drive Safely Work Week toolkit on a flash drive. The toolkit was also available on the Utah NETS webpage. There were 23 individuals in attendance at the event.

The first half of the event entailed talking about what Utah NETS is, giving an overview of the DSWW materials and networking with those in attendance. The second half of the event entailed traffic safety activities that attendees could participate in as well as learn about as resources to use within their companies to educate employees.

The Highway Safety Office brought their "Seat Belt Convincer" machine. This machine simulates what it is like to get into a crash at five miles per hour. There was also an obstacle course that helped educate participants on the dangers of impaired driving.

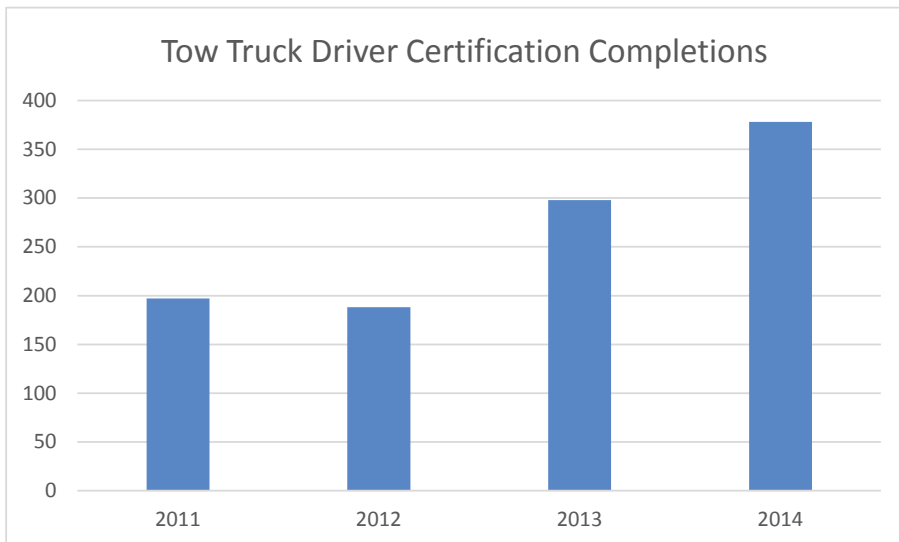

## Tow Truck Driver Certification

Since its launch in January 2011, over 1,000 Utah tow truck drivers have received their tow truck driver certification through the Utah Safety Council’s online program.

This is the first tow truck driver certification program in Utah that is entirely online for the convenience of tow truck drivers. This course has been approved by the Motor Carrier Division of the Utah Department of Transportation as meeting the requirements of an authorized program through which to obtain designation as a Certified Tow Truck Driver. This certification covers topics specific to Utah’s laws and driving conditions.

**378**  
**Individuals**  
**Completed their**  
**Tow Truck Driver**  
**Certification in**  
**2014.**

## First Aid, CPR and AED Training

The Utah Safety Council offers the National Safety Council's First Aid Training Programs. These programs and the accompanying certifications are nationally recognized. Employees trained in First Aid, CPR and AEDs and have the power to save lives. Learning how to respond effectively will also protect them at home, where an emergency can cost the same in lost work time and productivity.

These courses provide participants with the most up-to-date First Aid, CPR and AED training specifically focused on emergencies in the workplace. Participants learn life-saving skills including treatment for shock, bleeding and wounds, burns, medical emergencies and more.

Approximately 1,030 people completed the First Aid, CPR and AED certification course through the Utah Safety Council during 2014. Additionally, 60 on-site first aid courses were held at various companies throughout Utah during 2014.

**1,030**  
people completed  
the First Aid,  
CPR and AED  
certification  
course during  
2014

## First Aid, CPR and AED Instructor Certification

The Utah Safety Council's emergency care instructor training meets OSHA guidelines for First Aid and CPR in the workplace and the latest CPR and Emergency Cardiovascular Care Guidelines. Participants are taught methods that involve, influence and facilitate adult learning while refining their teaching skills. This course covers a proven, standardized method of teaching First Aid and CPR with high effectiveness. A total of 54 people received their instructor credentials during 2014.

## National Recognition

The National Safety Council recognized the Utah Safety Council with a Best Performance Award in Advanced First Aid. This award was given at the 2014 National Congress and Expo in San Diego in October.

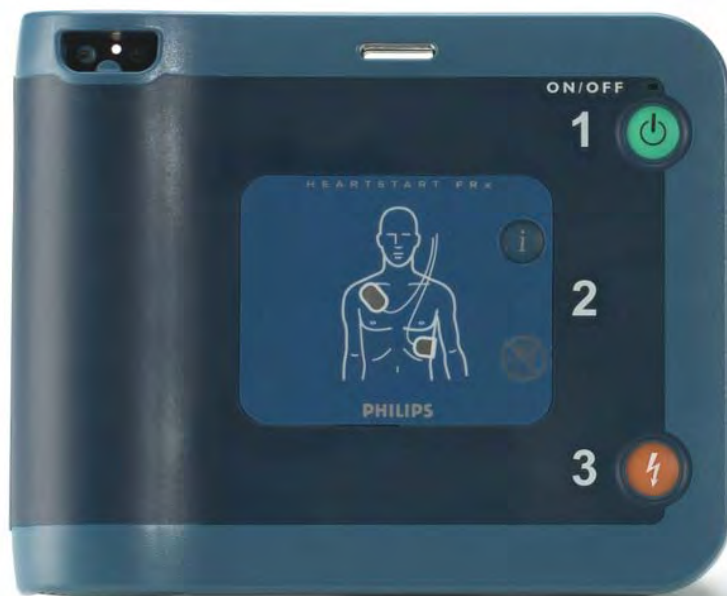

## Automated External Defibrillators

The Utah Safety Council is a distributor of Philips Automated External Defibrillators (AEDs). Two AED Lunch & Learn events were sponsored by the Utah Safety Council during 2014, on March 26 and August 7.

This year the Utah Safety Council invited Danny Berger, former Utah State Basketball player, and employees from Park City Recreation, to share their personal experiences with sudden cardiac arrest and using an AED. Many individuals were able to attend these hands-on events and learn first-hand how easy it is to use an AED.

In 2014, 26 AED units were sold to 14 different organizations. The Utah Safety Council trained all of these organizations on how to properly use their new AEDs.

## In the Community

The Utah Safety Council also delivers programs and educational services directed at keeping individuals and families safe in their homes and communities. Disabling injuries are more numerous in the home than in the workplace and motor vehicle crashes combined. These programs aim to reduce these injuries and deaths by increasing safe behaviors and practices.

### BUCKLE ↑ 4 ♥

Buckle Up For Love was implemented by the Utah Safety Council in 1995. The program is designed to reduce the number of child motor vehicle injuries and deaths in Utah by increasing proper car seat installation and use. Through the program, people can get their car seats checked for free by a Certified Child Passenger Safety Technician to ensure that they're installed and used correctly. Eighteen car seats were checked in 2014.

Buckle Up For Love also provides an opportunity to those who observe an unrestrained child in a moving motor vehicle to call our hotline, 800.887.KIDS, and report the license plate number, date and time, location, and description of the incident. The Utah Safety Council then sends the vehicle owner life-saving information on the importance of car seats and buckling up. Over 100 people received this information through the hotline in 2014.

Buckle Up For Love also provides a variety of free educational materials in print and digital form. In 2014, over 14,000 of these materials were requested, with thousands more distributed at fairs and other events.

If you observe an unrestrained child in a moving motor vehicle call

**800.887.KIDS**

The Utah Safety Council will send the vehicle owner life-saving information on the importance of car seats and buckling up.

## Take Safety Home

Take Safety Home was launched in 2009 and focuses on preventing the top five causes of death and injury in the home, which are poisonings, falls, fires and burns, choking and suffocation, and drowning. A variety of program materials are available to the public in print and on our website. They can request, free of charge, brochures on each of the five topics as well as an interactive home safety checklist CD-ROM. In 2014, over 5,200 Take Safety Home brochures and CDs were requested and distributed. Additionally, thousands more were given out at health and safety fairs and other community events.

## Health and Safety Fairs

The Utah Safety Council welcomes the opportunity to participate in employee and community health and safety fairs to provide information on our programs and the many services that we offer.

In 2014, we attended 44 of these fairs and provided materials to a few events that we could not attend.

Health and Safety Fairs in 2014.

## National Safety Month

National Safety Month is an annual observance directed by the National Safety Council. It takes place in June of every year, and each week of the month is focused on a specific theme.

### The themes for 2014 were:

- Week 1: Prevent Prescription Drug Abuse and Accidental Poisoning
- Week 2: Stop Slips, Trips, & Falls
- Week 3: Put an End to Distracted Driving
- Week 4: Utah Workplace Safety Week
- Week 5: Summer Safety

Weekly emails were sent to our contacts introducing each topic, linked to educational resources on our website. These resources included fact sheets, articles, 5-minute safety talks, quizzes, and more. To help encourage organizations to get involved and participate in National Safety Month, we held a Facebook contest in which participants posted their National Safety Month celebrations. The winning company was Maschoff Brennan and they won an ice cream cake party from Cold Stone.

### Kick Off Celebration

To kick off National Safety Month, the Utah Safety Council held our first Night Out with the Salt Lake Bees on June 5, 2014. Member organizations were encouraged to cheer on the Bees as they hosted the Sacramento River Cats. This was a fun opportunity for families and employees to get together and promote safety while watching a great baseball game. Upon entry, the first 2,500 fans received a Utah Safety Council co-branded baseball.

The night started with our Chairman of the Board, Mr. Bryan Pett, throwing out the ceremonial first pitch (*pictured to the right*). We had two informational booths that members and fans could visit with our staff and learn more about our programs and training opportunities. Throughout the night, we played two commercials from our YouTube videos and had several public service announcements highlighting many of our programs.

In addition to the activities of the night, we also held a Bees Radio Broadcast promotion throughout the 2014 season with the Zone Sports Network radio broadcasting. As the Bees made it across the plate safely to score the first run of each game, the announcer reminded the listeners that the Utah Safety Council encourages everyone to make it safely home every night.

Partnering with the Salt Lake Bees was a great way to promote safety in the community and kick off National Safety Month. We look forward to partnering with the Salt Lake Bees for another fun night at the ballpark.

Bryan Pett, Chairman of the Board

## Utah Workplace Safety Week

The Utah Safety Council was on the planning committee for the observance of *Utah Workplace Safety Week*. To begin the observance there was a Municipality Safety Round Table. The Utah Safety Council, along with Senator Karen Mayne and Workers Compensation Fund, gathered together the local municipalities and held a discussion about the safety issues that are facing these organizations.

Secondly, we participated in Utah's largest safety demonstration at the State Capitol to celebrate Utah Workplace Safety Week. There, hundreds of people gathered to listen to Senator Karen Mayne, Lieutenant Governor Spencor Cox, and community member, Bill Pitts, speak about the importance of workplace safety. Participants then continued with the demonstration, which was displaying the proper way to lift objects off the floor.

Finally, the Utah Safety Council was able to participate when Governor Gary Herbert signed into law Senator Mayne's bill that designated that the fourth week of June every year as *Utah Workplace Safety Week*.

We are excited about this annual observance, and we are looking forward to future events and activities in which we can participate to help increase the awareness and safety of Utah's workforce.

## Festival of Trees

The Utah Safety Council participated in the 44th Festival of Trees, which benefits the Primary Children's Hospital Foundation.

The title of our tree was "Home Safe Home", and its purpose was to raise awareness of home safety and provide a family with some essential home safety products to keep their loved ones safe during the holiday season and all year round.

The tree was brightly decorated and included products such as step ladders, fire extinguishers, combination carbon monoxide and smoke alarms, first aid kits, flashlights, night lights, a 72-hour kit, a radon detection kit, safety glasses, work gloves, and free training to our first aid/CPR and fire extinguisher training classes.

## Fiscal Year 2014

### Statement of Revenue Collected and Expenses Paid

|          |                |
|----------|----------------|
| Revenue  | \$ 1,800,064   |
| Expenses | (\$ 1,603,955) |
| Balance  | \$ 196,109     |

### Statement of Assets and Fund Balance

#### Assets

|                                 |                  |
|---------------------------------|------------------|
| Current Assets                  |                  |
| Cash                            | \$ 793,767       |
| Certificates of Deposit         | \$ 505,905       |
